

KEYMARK x4 INTERCHANGEABLE CORE CYLINDERS

Interchangeable core (I/C) cylinders enable non-technical personnel to quickly change a lock with the use of a special key. These cores can be replaced in less than ten seconds, saving time and money while improving security. This helps businesses with a high turnover rate maintain key control without having to rekey or change door hardware.

KeyMark small format I/C cylinders will retrofit Best-style installations, ideal when only patented key control is required.

All KeyMark I/C cylinders are high quality solid brass, can be easily combined in the field for greater flexibility and are designed to retrofit virtually many manufacturer's existing locksets.

INTERCHANGEABLE CORE FEATURES

- ◆ Utilizes the standard A2 pinning system in conjunction with a bitted slider locking arrangement which allows for more master keying capabilities for large master key systems. Up to 65,536 unique change keys in a 7 pin master key system on a single keyway
- ◆ Expandable, simple master keying available in SFIC and LFIC, as well as standard key-in-knob, mortise, and rim cylinders
- ◆ SFIC's are available in six or seven pin cylinders, and can replace Best style cores
- ◆ Standard Medeco cams and tailpieces can be used on KeyMark x4 cylinders
- ◆ Keys can be cut using many standard code type key machines

Commercial and industrial products are available in all finishes including: Bright Brass, Satin Brass, Satin Bronze, Oxidized & Oil Rubbed, Bright Chrome and Satin Chrome.

Other finishes may be available on request.
